CONCLUSION

The Cricket Club has now been in residence at the ASC Short Lane site for seven seasons so the time is right for the Club to consolidate the existing membership and to investigate all avenues for recruiting new members. This will, hopefully, secure the longer-term future of the Club and ultimately the future of the game of cricket in Ashford.

The Club must work together with its sister club, Ashford Hockey Club, to develop an Association with agreed processes and procedures to successfully manage the Short Lane site for the benefit of both clubs and their members. The primary aim has to be one of financial stability followed closely by the provision and development of equipment and facilities appropriate for each club.

The Cricket Club aims to provide facilities to cater for all standards of cricket from the grass roots right through to the prospective County player. Membership is currently available to all, no matter what their background or their playing level and this openness must **never** be restricted.

The Club has already established links with the local community. These links must be fostered and the licence arrangements with The Ashford High School (now Ash Technology College) are an ideal opportunity to further these links. The Club will need to be more pro-active in these arrangements with the School and not simply pay lip service to them. The "Chance to Shine" initiative will enforce this link along with links to its feeder schools.

The Club has recently fallen out of the top echelons of club cricket within Surrey. The aims outlined in this plan will provide stability and hopefully ensure progress is made towards a return to the top flight soon, whilst still providing facilities for players of all standards and abilities.

The Club must plan its own future. It will need to enlist the help of existing members plus other organisations and governing bodies to ensure the continuing development of the Club.

This plan is a living document. It must be revisited and reissued regularly and progress against its aims must be monitored.

Minor reviews of the objectives in this plan must occur on a yearly basis and a major review of the plan will be carried out in 2 years time when new aims and new targets can be set.

This plan is to be regularly reviewed with an update on an annual basis. A major review of the plan is to be held every two years.

Date for next review October 2006, with a major review in October 2007.
